Arbitrary Molecular Graph
Repeated over Time
G = (V,E)
Make coordinates invariant
Embed graph timesteps: PE, RoPE?
Lift via encoder
Lifts to unifed dim
|V|
|V|
Node-wise attention as message passing
Prior?
Raw feats?
xN Layers
Graph Heterogenous Cross Attention
FFN
Output Projection
K
V
Lift via encoder
Attention? Prior?
Attention Prior Alone?
Edge Features
Whole-graph features
Heterogenous Features
